GREAT PRODUCTS FOR GRAND DESIGNS

Welcome to Earnshaws Fencing Centre –
full of natural products and bound to
inspire you with new ideas for your garden!

We are proud of our exceptional and inspiring range – from garden furniture, decking and pergolas to essentials like fencing, panels, sheds, cabins and gates. Finishing touches are our speciality and the ranges include bark, aggregates, paving, planters, benches and hanging baskets – in fact everything except the plants themselves.

Friendly expert advice is always on hand and the vast stocks and extensive ranges mean that you'll be able to take away what you need and get cracking on that new project

straight away. The well stocked shops are thoughtfully laid out with the things needed to finish any job – nails, screws, hinges, brackets and tools.

We are proud of our traditional values of honest advice, high quality and value for money combined with a keen eye for interesting products and emerging trends in garden design. The result is innovative displays and product ranges that change and evolve each season.

DELIVERY SERVICE

We run our own in-house delivery service on all the products we supply. We will always aim to have the goods delivered ready for when you need them. Ask in the centres for a price to deliver your goods or alternatively just drive in to any of the centres and we'll be pleased to help you with your collection.

FITTING SERVICE

While many of our customers love to DIY if you don't have the time or the necessary skills we have a team of fitters able to undertake most projects. For fencing, decking, gate fixing, cabins or whole garden makeovers we'll be able to turn your dream into reality. We can even build up the flat pack furniture for a small extra charge.

EARNSHAW'S SUSTAINABILITY PROGRAMME

At Earnshaws we have always had a strong interest in ecological and environmental matters. From sourcing our material to managing our woodland we have always worked to the very best practice. We always try to minimise fuel miles on all our outward deliveries and purchases, and try to source locally wherever possible.

Some timber products will develop checks which are splits across the grain; this is perfectly natural as the timber dries and will not reduce the strength of the timber. As timber is a natural product it has the potential to move with the atmospheric conditions and we cannot be held responsible for this movement. In the very rare occasion where there is a proven manufacturing defect Earnshaws' liability shall in no circumstances exceed the price of the timber affected. Earnshaws shall not in any way be held responsible for any additional consequential costs or losses.

Prices correct at the time of going to press, but are subject to change without prior notice. All goods remain the property of the vendor until full payment has been received.

All Prices INCLUDE VAT

Our centres are stocked with all the essential extras to help personalise your project!

PREMIUM PANELS

This range of panels are built on the continent, using a rebated frame to ensure a strong and durable panel and are supplied pressure treated for maximum protection.

They are suitable for use with either standard or reeded timber posts or will fit within the 'H' section concrete posts. If using these panels with concrete gravel boards a pair of timber fillets are required.

Recommended Post Size

We strongly recommend a minimum of 60cm of post into the ground. Don't forget you will need to allow for longer posts when fencing on sloping ground.

Ensure that the strength of the post matches the style of panel, for heavier panels such as the heavy double-lap, a minimum of 75 x 100 is recommended for the lower sizes, with 100 x 100 for the taller panels. For the lighter trellis panels 75 x 75 section posts should be sufficient. Don't forget the double lap panels won't fit into the concrete posts.

As a general rule, base your post decision around the weight of panel, height of panel and how exposed the site will be to wind. Our sales team will be happy to answer any specific enquiries.

A full range of posts are available

See pages 18, 20, 22 and 27 for more information.

We keep a wide range of stock gates at the Fencing Centres. All crafted in our in-house joinery shops the hand gates are made to a standard metric 900mm x 900mm sizing along with taller 1800mm x 900mm side gates. These gates should make the perfect entrance for your home for years to come. Please ask for advice on specific requirements or to price non standard sizes.

All stock gates are hand crafted on site by our team of experienced and skilled craftsmen.

DRIVEWAY GATES

All our driveway gates are made to measure by our in-house joiners. The fitting and measuring of driveway gates is not easy and should only be undertaken by competent DIY'ers or tradesmen. At the Fencing Centre we have a team of skilled gate fitters who will measure, supply and fix your entrance gate.

All driveway gates are priced to requirements and due to the variations in the price of joinery grade timber, we are unable to list individual prices in the price list. Please ask in the centres for prices for your specific sizes and we can print out a sheet with each style individually priced.

Tankersley

These gates are all supplied in an untreated finish and will require a good quality treatment before fitting. These quality gates are made to a slightly lighter construction than the Stocksmoor gates. Again these gates are made to order only so the gate is tailor-made to fit your gap. Ask in the centres for details on the wide range of stains and preservatives we can offer to ensure these gates offer years of service.

TIMBER BEAMS

Job Earnshaw is a specialist producer of quality beam timber for all of your structural timber frame needs. We have in-house expertise from six generations of saw millers with a dedicated traditional sawmill producing responsibly sourced Oak and Douglas Fir timber beams that are cut to your specific requirements.

- Responsibly sourced timber
- Beam quality Oak and Douglas Fir, other species also available
- Softwood beams can be supplied pressure treated if required
- Beams cut to order (up to 12m x 600mm x 600mm)
- Specialist machining available – planed, mortised, chamfers, drilling etc
- Moffett offloading available for larger orders
- Many associated products available in stock and on display
- Turnkey design and installation service available

Ask on site for more information

We have been sawmilling for over 150 years and in that time we have built up a wealth of knowledge and experience. At the Fencing Centres we aim to supply from stock, a wide range of pressure treated softwood for all your fencing or landscaping requirements. Whilst we hopefully have every size you may require in our stock lines we are also able to saw any specific sections you may want in our sawmills.

Postsaver and Treatments

Our standard timber sourcing policy is mixed species of homegrown softwoods and while we air dry these pre pressure treatment unfortunately, due to an industry wide change in the types of treatment available, we cannot offer any lifespan guarantees.

If a defined lifespan is required we currently offer two alternatives; the planed or reeded posts are produced from kiln dried Redwood and come with a 10 year guarantee. Alternatively the Postsaver barrier system prevents the premature failure of timber posts by providing a physical barrier to fungal entry at ground level. Suitable for use with most posts this product also comes with a 10 year guarantee.

For products not in ground contact standard treatments are more than satisfactory. For further details ask in store or look at the treatment section on our website.

All our deck boards are double sided and supplied pressure treated. We can offer a supply and fit service on decks and walkways, ask at the sales counter for details.

See pages 36/37 for more information.

Manufactured from heavy gauge steel with a protective coating, Metpost post supports are designed to allow the erection of fence posts in minutes without the need for digging holes or mixing concrete. The spikes are ideal for use in less exposed areas for temporary fencing while the bolt-downs make fixing to paths or driveways easy. Available in two styles: the traditional wedge-grip which grips the post as it is knocked into the support, and the bolt-grip which grips the post by tightening two bolts.

FIREWOOD Centre

Everything you need for a roaring fire!

At Earnshaws we know our timber and have been cutting firewood since 1860 so you can buy with confidence. That is why we are opening a dedicated Firewood Centre at our Midgley branch.

We build up stocks of seasoned wood to ensure that the firewood you buy is a minimum of 12 months air dried when sold and all of our Firewood is environmentally sourced from our own managed woodlands.

- Hardwood logs
- Softwood logs
- Kindling sticks
- Solid fuels
- Fire lighters
- Log stores
- Oak Fire surrounds
- Fireside accessories

Need somewhere dry to store your wood this winter?

Even though the logs we supply are air dried they will always benefit from good stacking when you get them home. Ideally keep them out of direct rain but still exposed to the wind, our log stores are designed to keep your logs tidy while ensuring they reach the fire in perfect condition.

Firewood logs, kindling and fuels are also available at our Brigg and Wentworth Centres

TOP FIREWOOD TIP!

Logs stacked in spring will always burn better after an extra drying season.

Don't forget...

We can deliver everything from bags to wagon loads - call us today with your requirements!

NATURE TRAIL

We've spent years creating a haven for birds and animals at our Midgley Centre and the recently opened Nature Trail is a great way for families to spend time together and learn about the diverse wildlife that can be found in Yorkshire.

There are two paths to choose from, the shorter Play Trail with dens, obstacles and play equipment, or the longer Nature Trail that takes about twenty minutes to explore.

Free to all!

Informative, Educational, Fun!

Test your nerve on the rickety bridge...

Can you find the woven willow dens...

...or the mud hut hideaway?

Sheds and Cabins

At Earnshaws we have the solution to your outdoor building requirements whether that is a small tidy-away shed to store a few garden tools or a log cabin to act as a home office or additional living space.

We can offer a solution to suit most budgets and offer a supply and fit service on all the buildings we supply. While we offer a wide range as standard we are happy to look at any special requirements to fit specific needs or spaces.

A Great Tradition in Fencing

Records show that the Earnshaw family has been connected with the timber trade since 1780.

The business today, which was founded in 1860, carries the name of Job Earnshaw, who worked falls of timber in the local area near Wakefield. Soon his brothers joined him in the venture, and a small sawmill was built on the Midgley site, producing parts for horse drawn carts, gates, fence posts, rails and various items used in agriculture.

The company is still owned and managed by descendants of the founders and we still maintain the same service tradition that was so important back in the 1860s. While the company has adapted and changed over the years we have built on those years of experience to be true experts in our field.

Many of the products we sell today are still made by hand in our workshops where quality and durability are second nature.
