CabinSystems2015

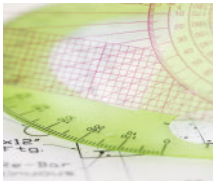

cabin systems

Most of our Log Cabin kits are assembled in the UK which offers our customers great flexibility to choose either a standard building or customise where to put doors & windows, overhang of the roof, roof style and height of log cabin.

The Cabins offer superb quality at incredible value for money, and we are certain that you will find a building that will suit your requirements. All the 44mm Log & 70mm Log Cabins are double glazed as standard (excluding the garages) which adds to their outstanding value.

Most of the range can be customised and adapted to suit your needs at little additional cost. Window & door positions can be altered, Roof overhangs can be minimised & a pent style roof can be added on many of the buildings. You can choose to add roofing shingles, floor & roof insulation & terraces to enhance your building.

If you wish to erect the building yourself we provide clear & easy to follow installation manuals. Alternatively, if you would rather enjoy relaxing in your new space immediately, you may wish to opt for our installation service.

We offer a delivery service throughout the UK. Please ask about any delivery charges that may apply to where you live.

All of the Log Cabins are supplied untreated, with the exception of the foundation beams which are pressure treated with Tanalith E. We strongly recommend that your Log Cabin is treated within 14 days of installation.

There are a wide range of treatment products now available meaning that you will be able to co-ordinate your log cabin with its surroundings. The treatment product chosen **must** be suitable for planed timber. Any product that is not suitable for planed timber, and is only suitable for rough sawn timber should **not** be used on your Log Cabin. You will need to both treat your building with a wood preservative to protect the wood from rot or decay and weatherproof the wood using products for this purpose. These are often combined in one product but please phone us for more information and our recommended range of products.

Summerhouses

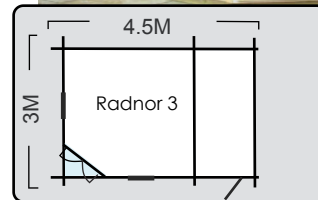

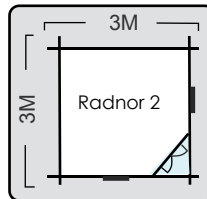

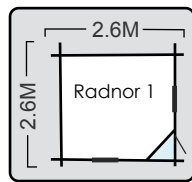

Radnor Log Cabin

This lovely corner summerhouse fits neatly to any **corner** of a garden, ideal for gardens where space is at a premium. Made from 28mm logs, the Radnor Corner Log Cabin comes with two side single glazed windows & roofing felt as standard. They are all 2.8m high to the ridge.

Radnor 1 Log Cabin - 2.6 x 2.6 m - with a single door to the front

Radnor 2 Log Cabin - 3.0 x 3.0 m - with a double door to the front

Radnor 3 Log Cabin - 3.0 x 4.5 m - with a double door to the front and a side store with solid door

The Radnor 3 is also available in 40mm logs

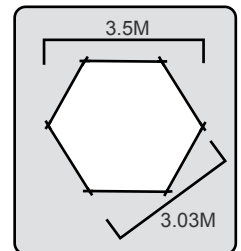

Newport Hexagonal Cabin

A hexagonal summerhouse - a beautiful addition to any garden. Constructed from 28mm logs with roofing felt as standard. The Newport comes complete with double opening doors and single top opening windows in single glazing.

3.5M Diameter - 28mm Logs

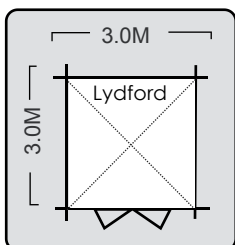

3.36M high to apex

Add shingles as an extra

Lydford Summerhouse

A variation on the traditional square log cabin. The Lydford Log Cabin is a pretty summerhouse made from 28mm logs. The Lydford comes with fully glazed double doors to the front.

3.0m x 3.0m in 28mm Logs

Add Shingles, floor insulation and windows as extras

Newark Shelter

A great shelter for any garden, or to house a hot tub. A pressure treated decked floor is provided as part of the kit as standard.. Other sizes available on request.

3.2m x 3.2m in 28mm Logs

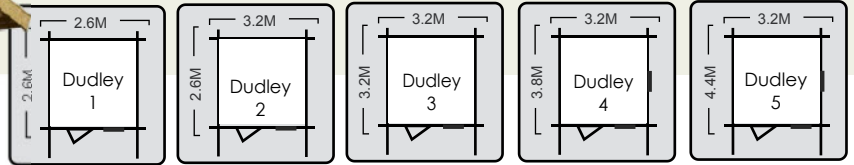

28MM Log Cabins

Beautiful summerhouses, garden offices, extra space or play room. Made from 28mm log thickness, extra doors and windows can be fitted or perhaps a terrace to make these cabin as individual as your needs are. Windows and doors are single-glazed with the doors right hand hinged and windows are top hinged. The buildings come with tongue & grooved 19mm floor & roof and they come with green mineral roofing felt as standard or upgrade to roofing shingles. All our 28mm buildings are 2.57m high and 2.05m to the eaves with a 0.7m overhang unless stated.

The Dudley comes with a half-glazed door & single window. A double side window comes as standard with the larger sizes. An optional terrace to the front of the building is available in 1.2m or 1.5m depths.

70mm Log Cabins

These beautiful log cabins make fantastic **Garden Offices**. Constructed from 70mm thick logs, they offer superb quality and comfort. Double glazed as standard throughout, the buildings are **exceptional quality at an affordable price**. The windows and doors are constructed from laminated timber and fitted with stainless steel trim. The windows are tilt & turn allowing you to ventilate the building without leaving the windows wide open. All 70mm Log Cabins have 19mm thick roof boards & floorboards as standard. The buildings are 2.9m to the height.

Southwold 1

Double Glazed
as standard

Customise

Do you want to have a different window or door combination
Do you want the building without an overhang?

70mm Log Cabins

Stirling

The Stirling is guaranteed to offer you **exceptional quality at incredible value for money.** Constructed from 70mm logs and creating nearly 30 square metres of floor space.

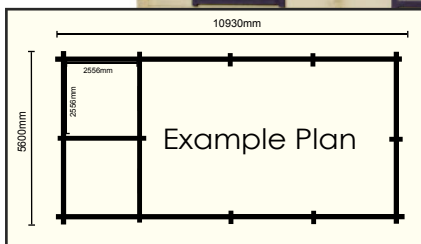

Double Glazed
as standard

Building	Stirling
Width x Length	5.6 x 5.6
Included doors & windows	2 Double Windows, 1 Single Door & 1 Double Door
Roof Shingles	As extra
Floor Insulation	As extra
Roof Insulation	As extra
2m Terrace	5.6m - As extra

Do you require a larger building

The Stirling can be extended in blocked units. Internal room partitions can be added and Windows & doors added both internally & externally

Doors & Windows

Standard Doors & Windows

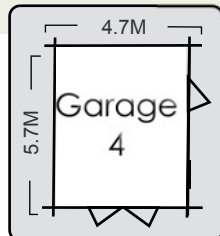

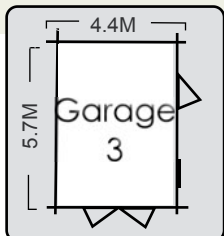

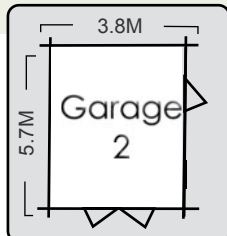

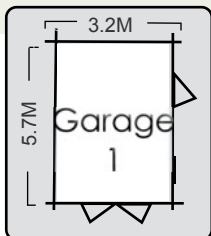

Double Glazed Doors & Windows
Tilt & Turn, inward opening windows
With aluminium gutter
Doors with stainless steel door trim

Standard Double Glazed Doors & Windows			
Single Window	Double Window	Single Door	Double Door

Garages

Single Garages

Impressive to look at but practical too. The large front opening garage doors are ledged and braced with internal top and bottom bolts. There is no floor in the Garage so it is strongly recommended that a substantial concrete base is laid. Made from 44mm logs, we offer four sizes in the single garage and an optional partition wall. Additional doors and windows can be added if required. The garages are single glazed as standard but you can add double glazing as an optional extra. Please note that they now come with 6 galvanised hinges as standard. The single glazed windows are top hinged.

Double your space

Join two garages together to increase your space!

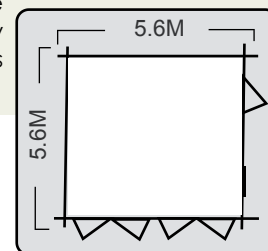

Building	Garage 1	Garage 2	Garage 3	Garage 4

3.02M(H) to ridge

Double Garage

Two sets of garage doors, both fitted with internal top & bottom bolts and hasp & staples. Please note that they now come with 6 galvanised hinges as standard. The Double Garage is constructed from 70mm logs and provides just under 30 square metres of floor space, giving ample room for parking and storage. The Double Garage is supplied without a floor. Windows & doors are single glazed. Please note that doors may be supplied without curved fascia as illustrated.

Building	Double Garage
Width x Length	5.6 x 5.6
Doors & Windows included	2 Garage Doors, Single Door, Double Window
Roof Shingles	Available as extra

3.04M(H) to ridge
70mm Logs

Up & Over Garage Doors

Horizon

Carlton

Will fit both single & double garages.
AVAILABLE IN CHOICE OF BROWN OR WHITE.
With black handle option. Brush trim available.

Available as an extra

Extras for Log Cabins

ROOF SHINGLES

Shingle felt roofing tiles are an attractive alternative to the Green Mineral Roofing felt. They are manufactured from a combination of bitumen and bitumen impregnated fibre glass topped with high quality aggregates. They withstand wind, rain, snow and temperature extremes without deterioration.

Customising your building

We can offer a range of options if you require a slightly different building to those in the brochure

- Windows & Doors can be added or placed in different positions
- Using the standard log sizes we can also offer different combinations of buildings to those in the brochure e.g. If you require a 44mm log cabin 5.7m wide and 4.4m deep.
- We can offer a pent roof style in many of the log cabins
- We can adjust the height of the building if necessary for planning purposes.

Extra Logs

Additional logs can be purchased e.g. to increase the height of your building. Additional logs are available:

- 28mm Logs
In 2.6M, 3.2M, 3.8M & 4.4M lengths
- 44mm Logs
In 3.2M, 3.8M, 4.4M, 4.7M & 5.7M lengths
- 70mm Logs
In 4.4M & 5.6M lengths
